

The new Standard of the second Millennium

TRAPMATIC[®] SYSTEM

The Next Generation

99% safe even for osteomalacia

The TrapmaticSystem[®] ensures a larger quality marrow specimen by automatically trapping the sample in the needle cannula avoiding the painful needle deflection technique, in 3 easy steps.

- Greater patient comfort
- Easier marrow sampling
- Lower risk of specimen loss
- Faster procedure
- Better quality specimen

TRAPMATIC SYSTEM TRAY

Complete kit formed by:

- Trapmaticsystem
- Adhesive fenestrated blue drape
- Plane blue drape
- N.3 labels for patient data
- White sterile towel (40cmx44cm)
- N.1 stirring rod for Formalin mixing
- N.5 glass slides (cytology)
- Mini scalpel
- N.2 three-places glass slides holders
- Sponges N.10 (7,5cmx7,5cm) N.5 (5cmx5cm)
- Polyethylene clear envelope sampling holder
- Hypodermic needle 21G / 25G for subcutaneous injection
- N.1 syringe (10cc) for anaesthesia with pre-assembled filtrated needle
- N.1 vacuum packed specimen tube for histological sampling preservation (5ml)
- N.2 specimen tubes for EDTA (anticoagulant) for cytological bone marrow marrow sampling (4.5ml) 15%
